What Does Every Local System have in Common?

All of these systems have one thing in common: the need for quality cataloging records. LaserCat, WLN's four million MARC record bibliographic database on CD-ROM can help you convert and maintain your library's catalog.

The LaserCat database has records in all formats, including books, serials, sound and video recordings and computer files. There are no separate discs you need to purchase. You get high hit rates and quality records in one database. Quarterly updates provide an ongoing source of current cataloging.

LaserCat's powerful and easy-to-use interface makes locating and exporting

records an effortless task. You can modify records for your local system as they are downloaded.

LaserCat for Windows includes a sophisticated MARC record editor for modifying records from the LaserCat database or creating new records.

LaserCat is affordable as a quarterly, school-year or annual subscription. The LaserCat retrieval software is available in Windows, Macintosh and DOS versions.

LaserCat is also available through BCR in Colorado, Iowa, Kansas, Nevada, Utah, and Wyoming.

OLA QUARTERLY

The Oregon Library Association

Everyone—from new librarians to veteran support staff just discovering the organization, from librarians new to the state to long-time Oregon librarians—views the Oregon Library Association with a set of assumptions and questions. This issue of *OLA Quarterly* is devoted to OLA itself. We hope it provides an adequate introduction to newcomers and encourages them to join. We hope it provides an overview of what OLA does and entices members to become involved. We hope it explains how OLA works and enables members to become more effective parts of the organization. Part of this issue is extracted from the OLA Bylaws and Procedure Manual. Board members and committee and round table chairs were responsible, in most cases, for their portions of this issue.
